MANUFACTURING SECTOR CV

Technology at the Forefront of the Fourth Industrial Revolution

MODALITY SYSTEMS HELPS YOU TO REDUCE YOUR TIME-TO-MARKET

In the age of the Fourth Industrial Revolution (4IR), adopting new technology has become a key component for success in the Manufacturing industry. Optimising business processes through the successful adoption of technology has transformed the sector's ability to innovate. As a result, 4IR is expected to generate a value of more than $3 trillion by 2025.

However, according to the World Economic Forum, the adoption of technology in your industry is stalling, with over 70% of companies unable to progress past pilot phases. With your distinct challenges around disparate workforces, and the need for fast decision making to allow slick production processes in a highly competitive sector, maximising efficiencies is paramount.

Finding ways to transform how you efficiently collaborate across teams, production sites and time zones is critical, with accessibility and user adoption taking priority in your strategies. Manufacturers who can unlock the value of collaboration technology can turn their product visions into reality on a much more efficient timescale, seeing financial gains faster and leaving others in the industry behind.

HOW IS MODALITY SYSTEMS SUPPORTING THE MANUFACTURING SECTOR?

Delivering software and solutions that enable technology to be successfully deployed, adopted and governed is critical. In collaboration with Microsoft, Modality addresses these challenges:

Microsoft Teams
A secure collaborative workspace that acts as an integration window for many other tools, products and services within Office 365

CreateTeam
A simple Microsoft Teams app that regulates how a team and its credentials can be created to ensure governance, compliance and drive adoption

OneMeeting
A video meeting system that enables the integration of existing infrastructure with Skype and Teams

Teamwork Analytics
Advanced PowerBI reporting and automation of Microsoft Teams for optimal deployment, adoption and collaboration at scale in the Modern Workplace

Microsoft Azure
An evergreen set of cloud services to help your organisation meet your business challenges. Azure offers you the freedom to build, manage, and deploy your applications at scale, even across a global network, using the right tools for business

THESE SOLUTIONS CAN:

Enhance collaboration - Breaking through silos and reducing interdependencies to enable effective collaboration is crucial to Manufacturing. Solutions such as Microsoft Teams allow you to liaise across time zones, production sites and any other geographical or departmental barriers to collaborate efficiently on one single platform. Innovate, make decisions faster and decrease your time to market.

Cultivate innovation - Empowering customers and employees with the confidence to use technology to collaborate is critical. Modality's software and solutions are backed by consultancy that supports you from initial consultation, through to user adoption and post-deployment support. For example, Teamwork Analytics aids the successful user adoption of Microsoft Teams, providing data-driven, actionable insights and reporting on the implementation and measurement of collaboration initiatives.

Drive ROI and modernisation - Technology must empower you to manage the changing digital demands of the modern era, creating more efficient and immediate access to online services and omni-channel communications. Modality's software and services move organisations away from legacy systems promoting a Cloud-first strategy. This enables ROI from reduced cost, greater flexibility and scalability of online services to cope with production demands.

Enable accessibility - With disparate workforces across Manufacturing sites, secure and efficient communication depends on real-time access to information and the ability to collaborate anywhere at any time. Solutions such as Teams and OneMeeting enable this by creating an experience that allows multiple and integrated communications channels for ease of contact, whether office-based or on the factory floor.

Stay secure - Solutions such as Teamwork Analytics enable the monitoring of cross-company communications, reducing the risk of data breaches and protecting your IP. Also, CreateTeam can centralise the management of all Microsoft Teams activity, allowing the removal of unused Teams to prevent the unnecessary 'sprawl' of data. Underpinning everything we do at Modality is our Secure by Design approach, with years of experience in industry-specific security requirements, you can have absolute trust that our solutions and services focus on the confidentiality, integrity and availability of your data.

WHY MODALITY SYSTEMS FOR MANUFACTURING SECTOR TRANSFORMATION?

Supporting your business your team and you

Wherever you are on your journey to digital transformation, Modality can help you to take advantage of the full business value and transformational impact of Microsoft's communications and collaborations suite.

Understanding and appreciating common pain points such as security and budgets, Modality's team of consultants will work closely with you to deliver software and services that put adoption, security and governance at the forefront of your strategy.

Modality is fully ISO27001 certified, demonstrating our expertise in transforming Manufacturing services with flexible, secure, cost-efficient and highly resilient technologies.
