SECURITY MANAGED SERVICE

Ensuring security across your digital landscape

CLOUD TECHNOLOGY COMES WITH OPPORTUNITY AND RISK

Organisations worldwide are embracing the opportunities that cloud technology has to offer, connecting with customers more easily, empowering remote workforces and optimising day-to-day operations. Alongside these opportunities, the reduction of traditional IT boundaries presents a new challenge to ensure company assets are kept secure. A third of successful enterprise attacks are on Shadow IT resources, and only 26% of European companies say that they are GDPR compliant. As workers bring devices, apps, and information to work, organisations must find solutions to ensure security across their digital landscapes without impacting business productivity.

ENSURE THE SECURITY OF YOUR MICROSOFT INVESTMENT THROUGH INDUSTRY-LEADING EXPERTISE

The Microsoft security and compliance landscape can be complex, including multiple configurations, dashboards, and audit logs, all of which are essential components for ensuring security and compliance. Modality Systems can reduce this complexity by delivering a service that gives a unified view of your current state. As a recognised global leader and award-winning Microsoft Partner, you'll benefit from Modality's 14 years of experience providing best practice advice and guidance, as well as periodic architecture and configuration reviews to ensure your security position is always relevant.
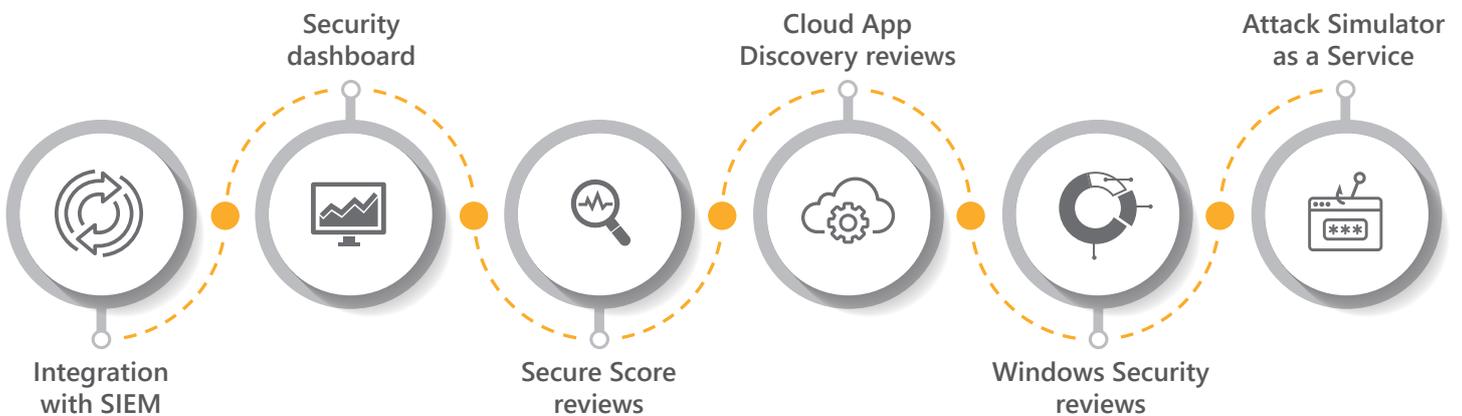

SECURITY MANAGED SERVICE: THE BENEFITS

Modality's Security Managed Service ensures your security and governance position remains uncompromised by offering:

- A unified security dashboard to highlight your current state and risks

- Security and compliance advice and guidance from our industry experts when you need it

- Updates on technology and service developments via periodic reviews

- Automated actions to combat inappropriate user access or sharing of data

- Identification of classified or sensitive data in the wrong place

- Management and control of access

REDUCE THE COMPLEXITY OF DIGITAL SECURITY

Modality's Security Managed Service includes:

✔ Advanced integration with SIEM

✔ A single security dashboard utilising Microsoft's Secure Score

✔ Secure Score reviews, reporting, and ongoing assessments:

 • Enhanced Secure Score tracking through native Office365 and Modality PowerBI dashboards
 • Ensure security actions have been implemented correctly to maintain your desired configuration
 • A comprehensive service that develops alongside Microsoft Secure Score

✔ Cloud App Discovery reviews, reporting, and ongoing assessments:

 • Continuously monitor cloud usage
 • Identify, assess, and advise on remediation for Shadow IT related issues
 • Enhanced reporting
 • Support for Cloud App Security deployment and customisation

 • Continual assessment of new features added to Cloud App Security

✔ Windows Security reviews, reporting, and ongoing assessments:

 • Continuous monitoring of Windows security posture
 • Identify, assess, and advice on remediation of endpoint weaknesses through:

  - Microsoft Defender ATP
  - Microsoft Secure Score
  - Threat & Vulnerability Management

 • Enhanced periodic reporting
 • Support in Microsoft Defender ATP deployment and customization

✔ Attack Simulator as a Service

 • Regular simulated phishing attacks
 • Report/review 'at risk' users
 • Identify security awareness training needs

Integration with SIEM → Security dashboard → Secure Score reviews → Cloud App Discovery reviews → Windows Security reviews → Attack Simulator as a Service
